PNEUMATIC AIR LINE FILTER | PART NO. 4/183012

Unofficial product information based on item photographs and part listing.

PRODUCT OVERVIEW

Type: Inline compressed-air filter with transparent collection bowl.

Function: Helps separate contaminants and collected liquid from compressed air.

Construction: Metal head, transparent bowl, retaining ring and bottom drain.

Location on nameplate: Compagnia Italiana Westinghouse Freni e Segnali, Torino.

Nameplate markings: 4/183012 | 150 | series marking appears 77II.

The meaning of "150" has not been verified; it is NOT a pressure rating.

IMPORTANT

Connection size is tentatively listed as 1/2 inch in a parts listing.

Pressure, temperature, flow rate and filtration grade are not confirmed.

Verify these parameters with the manufacturer before installation.

PNEUMATIC AIR LINE FILTER | PART NO. 4/183012

Unofficial product information based on item photographs and part listing.

IDENTIFICATION / TECHNICAL DATA

Brand	WABCO Westinghouse
Part number	4/183012
Product category	Pneumatic compressed-air filter
Country indicated	Italy (Torino company nameplate)
Body	Metal head; alloy/material not verified
Bowl	Transparent; exact polymer not verified
Drain	Bottom manual drain fitting (visually identified)
Connection	Possibly 1/2 inch; requires physical verification
Operating pressure	Not established
Operating temperature	Not established
Filtration grade	Not established
Flow rate	Not established
Marking 150	Meaning not established

BASIC FUNCTION AND CARE

Compressed air enters the filter head; contaminants are separated.

Collected liquid can be observed through the transparent bowl.

Depressurize the system fully before maintenance or disassembly.

Nameplate: "PULIRE SOLO CON SAPONE DA BUCATO".

Translation: "Clean only with laundry soap." Avoid incompatible solvents.
