## **Technical Information**

# **General Description**

Series N needle valves are ideal as speed controls on hydraulic and pneumatic systems where a reverse flow check is not needed. They provide excellent control and a reliable shut-off in a very small envelope.

## Operation

A two-step needle allows fine adjustment at low flow by using the first three turns of the adjusting knob. The next three turns open the valve to full flow, and also provide standard throttling adjustments.

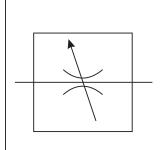

### **Features**

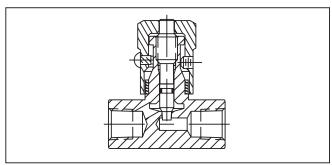

- The exclusive "Colorflow" color-band reference scale on the valve stem is a great convenience and time-saver in setting the valve originally and in returning it to any previous setting.
- A simple set screw locks the valve on any desired setting.
- A tamperproof option (T) feature is also available to prevent accidental or intentional adjustment of flow setting.

Maximum Operating Pressure	Brass:	140 Bar (2000 PSI); except for N1600 brass which is 35 Bar (500 PSI)			
	Steel & Stainless Steel:	345 Bar (5000 PSI) for 200 thru 1220; 207 Bar (3000 PSI) for all other sizes			
Material	Body	See ordering code			
	Knob	Steel - Zinc plated			
	Needle	416 Stainless Steel			
	Stainless Steel Bodies	303 Stainless Steel			
Temperature Range of Seal	-40°C to +121°C (-40°F to +250°F) Nitrile (standard)				
Compound	-26°C to +205°C (-15°F to +400°F) Fluorocarbon				

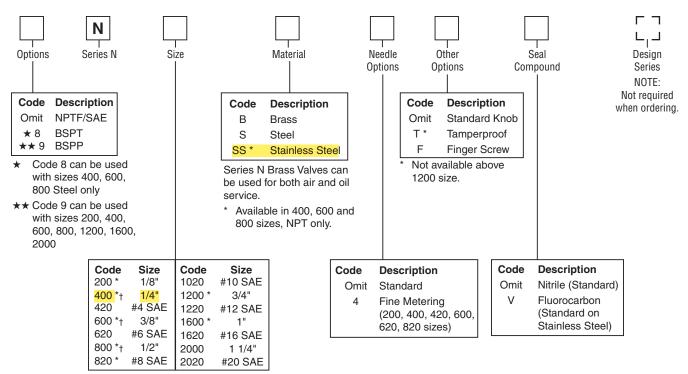

WARNING: This product can expose you to chemicals including Lead, Nickel (Metallic), or 1,3-Butadiene which are known to the State of California to cause cancer, and Lead or 1,3-Butadiene which is known to the State of California to cause birth defects and other reproductive harm. # **Knob Options**

Tamperproof Option (Code "T") permanently locks knob at desired flow setting by installing a pin in predrilled hole.

Finger screw Option (Code "F") provides this thumbscrew in place of set screw.
