

# Flush-mounted pressure and level transmitters - PZM/VRM modular system series 100/101 -

## FEATURES

- EHEDG-ASEPTIC CLASS I CERTIFIED MODULAR PROCESS CONNECTION SYSTEM
- PRECISE MEASUREMENTS WITH  $\leq \pm 0.15\% \text{ FS}$
- TURN-DOWN 10
- INTEGRATED OR EXTERNAL OPUSM DISPLAY AND OPERATING MODULE
- DIRECT ENTRY OF PARAMETERS WITH PLAIN TEXT DISPLAY
- VACUUM-PROOF AND EXTREMELY OVERLOAD SAFE
- EASY TO CLEAN AND HIGH PROTECTION CLASSES IP67 AND IP69K
- APPLICATION STRENGTHS: CONTENT AND PROCESS PRESSURE MEASUREMENTS / VACUUM MEASUREMENTS UNDER HIGH TEMPERATURES

## DESCRIPTION

The PZM and VRM pressure transmitters are suitable for taking pressure and filling level measurements in pipelines and containers. The modular process connection system offers a wide range of connection adapters and helps to cut costs in the long term. The flush-mounted process connection with O-ring seal and stainless steel membrane is certified to EHEDG type EL-ASEPTIC CLASS 1 and is thus predestined for measurements which satisfy even the most stringent hygiene requirements.

The sensor measuring ranges of the piezoresistive vacuum-proof measuring cell with stainless steel membrane of the PZM pressure transmitters range from -1/0...0.35bar to -1/0...100bar. The VRM pressure transmitters feature a capacitive measuring cell with ceramic membrane and are designed to measure from -1/0...+4bar to -1/0...+70bar or 0...4bar to 0...70bar Given their high overload protection, they are ideal for taking measurements under conditions where pressure shocks and cavitation are possible. Special measuring ranges are possible for both versions.

# Flush-mounted pressure and level transmitters

## - PZM/VRM modular system series 100/101 -

All the pressure transmitters in series 100/101 are designed for universal applications and, in particular, for applications with constantly high temperatures of up to 200°C. Furthermore, using the on-site display with series 100 and the display and operating module OPUS M in series 101, the pressure transmitters can be simply read out, configured and diagnosed.

### TECHNICAL DATA

General details							
Device type / measuring principle	PZM 100/101: piezoresistive VRM 100/101: capacitive						
Input							
Measuring ranges	PZM 100/101						
Standard nominal measuring ranges [bar]	relative	OP	absolute	OP	relative	OP	absolute
OP = overload protection [bar]	0...0.35	1			-1/0...4	25	0...4
	0...1	3	0...1	3	-1/0...10	40	0...10
	-1/0...2.5	8	0...2.5	8	-1/0...20	40	0...20
	-1/0...5	15	0...5	15	-1/0...40	60	0...40
Special measuring ranges are available on request. All measuring cells are vacuum-proof	-1/0...10	30	0...10	30	-1/0...70	105	0...70
	-1/0...30	90	0...30	90			
	-1/0...100	250	0...100	250			
Setting the measuring ranges	Via the keypad of the OPUS M display and operating module / via the integrated on-site display						
Setting ranges	Start the measuring zero: 0...90% of the sensor's nominal measuring span Measuring span: 10...100% of the sensor's nominal measuring span						
Burst pressure DIN16086	$\geq 4$ -fold measuring range						
Output							
Output signal	2-wire: 4...20mA with a test circuit connection in the device						
Fault signal	Optional: 3.8mA, 22mA, hold (i.e. holding the last value)						
Current limitation	3.85mA and 21.5mA (normal operation)						
Integration time	Continuously selectable between 0 and 300s (setting time after a pressure leap)						
Measuring accuracy							
Reference conditions	acc. to DIN IEC 770						
Linearity, hysteresis and repeatability as per the limit point method DIN IEC 770	$\leq \pm 0.15\%$ of the sensor's nominal measuring range						
Activation time	< 5s (the device will carry out a self-test.)						
Setting time (without damping)	< 200ms						
Long-time drift	$\leq 0.2\%$ of the span per year						
Thermal hysteresis	$\leq \pm 0.75\%$ beginning of the measuring range / $\leq \pm 0.8\%$ end of the measuring range (VRM) $\leq \pm 0.2\%$ of the sensor's nominal measuring range / 10K (-20...+80°C) from 4 bar (PZM) $\leq \pm 0.3\%$ of the sensor's nominal measuring range / 10K (-20...+80°C) up to 0.6 bar (PZM)						
Conditions of use							
Installation position / calibration position	Any position / standing vertically						
Medium temperature	PZM:	T1: -40...+125°C (140°C over one hour at the most)					
		T2: -40...+200°C (high-temperature version)					
	VRM:	-40...+140°C					
Ambient storage temperature	Type 101:	-40...+85°C					
	Type 100:	-30...+75°C					
	(Below -20°C cable breakage might occur and the display's function may be impaired.)						
Protection class acc. to EN60529	IP 67 and IP 69K						
Electromagnetic compatibility	Sensitivity against interference: acc. to DIN IEC 61000-6-2 Interference radiation: acc. to DIN IEC 61000-6-4						
Construction							
Electrical connection	<ul style="list-style-type: none"> <li>- Standard: cable screw connection M16x1.5, nickel-plated brass, stainless steel available on request</li> <li>- Optional: round plug-in connector M12x1, nickel-plated brass, stainless steel available on request</li> <li>- Optional: angle plug acc. to EN 175301-803</li> <li>- Optional: reference cable</li> </ul>						
Process connection	<ul style="list-style-type: none"> <li>- Membrane, flush-welded on the front, CrNiSt, other materials available on request</li> <li>- EHEDG type EL-ASEPTIC CLASS 1, certified connection system PZM / VRM with press screw M38x1.5 and elastomer sealing</li> <li>- Process seal EPM (FDA) (temperature range: -20...+150°C)</li> <li>- Process seal FPM (FDA) (temperature range: -40...+200°C)</li> </ul>

### ORDER INFORMATION for accessories PZM/VRM modular system series 100/101 (Please order separately)

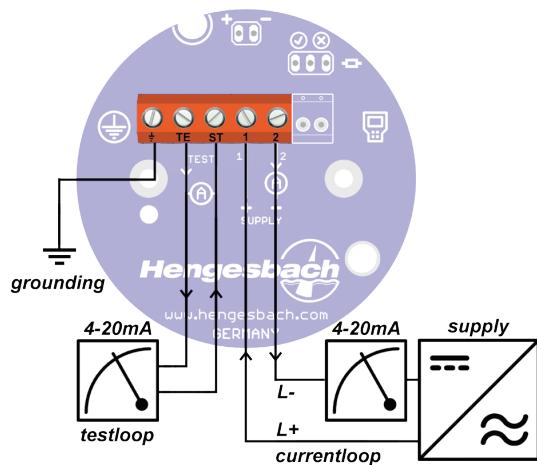

<b>Item no.: Z-PEM5FPZM</b>	<b>Item no.: Z-PEM5FPZM</b>
	
<b>Welding socket PEM5FPZM</b> for modular connection system PZM, VRM; for welding in tanks cylindric d=60mm (without welding collar), with inner thread M 38x1,5, material stst 1.4404 (AISI 316L) <b>Please order separately:</b> WAZ3.1 acc. EN10214/ADW2 and re-stamping certificate	<b>Welding socket PEM5FPZM</b> for modular connection system PZM; for welding in tanks. As previously described, but optional: • electropolished available • surface roughness $\leq 0,5\mu\text{m}$ • Z-PEM6FPZM; with 3 leakage holes
<b>Item no.: Z-PEM3FPZM (for tubes &gt; DN50)</b>	<b>Item no.: Z-PEM9FPZM</b>
	
<b>welding socket PEM3FPZM (for tubes &gt; DN50)</b> modular connection system PZM to fit tubes > 50DN diameter d=53mm with M38x1,5 internal thread material stst 1.4404 (AISI 316L) <b>Please order separately:</b> WAZ3.1 acc. EN10214/ADW2 and re-stamping certificate	<b>Weld-on socket for tubes PEM9FPZM</b> for modular process connection PZM for welding on tubes DIN E10357, series A-DN40 intended use: Pressure transmitter Type PZM, VRM; with M 38x1,5 internal thread material stst 1.4404 (AISI 316L) <b>Please order separately:</b> WAZ 3.1 acc. EN 10204/ADW2 & re-stamping certificate
<b>Item no.: Z-PVA6FPZM</b>	<b>Item no.: Z-PDR6FPZM</b>
	
<b>PZM-process adapter VARIVENT® d=68mm (form N) for DN 40-125</b> universal adapter for the modular connecting system PZM, VRM VARIVENT®-flange diameter d=68mm, PN16, material stst 1.4404 (AISI 316L) for tubes DN40-125 <b>Gaskets are not within the scope of supply</b>	<b>Process adapter DRD-flange, d=65mm</b> universal adapter for modular system PZM, DRD adapter d=65mm, with flange, material stst 1.4404 (AISI 316L)
<b>Item no.: Z-PCL5FPZM</b>	<b>Item no.: Z-PBS_FPM</b>
	
<b>Process adapter Clamp DIN 32676 DN50</b> universal adapter for transmitter system PZM, Clamp DIN32676 DN50/PN16, material stst 1.4404 (AISI 316L) for use: PZM,VRM - without sealing and bracket -	<b>Process adapter DIN 11864-1, Form A for tubes DIN 11866, Tube A (DIN11850), DN 40 / DN 50</b> universal adapter for modular system PZM collar with groove nut DIN11864-1 DN40/PN40, DN50/PN25, material stst 1.4404 (AISI 316L)
<b>Item no.: Z-PMN_FPM</b>	<b>Item no.: Z-PSN_FPM</b>
	
<b>Process adapter for PZM-system with union nut DIN 11851</b> <b>DN 40 / DN50 / DN65 ...</b> DN40/PN40, DN50/PN25, DN65/PN25, DIN 11851, material stst 1.4404 (AISI 316L) for use with system PZM/VRM	<b>Process adapter with union nut acc. SMS Norm DN38 (1,1/2")</b> Universal adapter for modular PZM system DN38 respectively 11/2" material stst 1.4404 (AISI 316L)
<b>Item no.: Z-PVS1FPZM</b>	<b>Item no.: Z-PED9FPZM</b>
	
<b>Plug for PZM adaptors</b> with fixing bolt M38x1,8 material stst 1.4404 (AISI 316L) O-ring in material EPDM	<b>Welding dummy</b> material Brass 2.0401 for welding sockets type PZM/VRM

### ELECTRICAL CONNECTION

The standard electrical connection is via a cable screw connection M16x1.5. On removing the device lid, the connection is created using screw terminals. The connection diagram in the transmitter head can be seen in the figure below:

The supply voltage is connected via the two terminals 1 (+) and 2 (-). The current flowing in this loop represents the existing measuring value.

The terminals **TE** and **ST** provide a test circuit connection with which the actual loop current can be measured without interruption using an ammeter.

The ground terminal is for potential equalisation between the measuring device and the measuring point.

Alternative connection options are a round plug-in connector M12x1, an angle plug acc. to EN 175301-803 as well as a factory-fitted reference cable with integrated vent capillary. The reference cable comes in lengths of between 1...80m. The electrical configurations are listed in the following:

Round plug-in connector M12x1	Angle plug acc. to EN 175301-803	Connected reference cable								
		<table border="1"> <tr><td>Brown</td><td>Supply +</td></tr> <tr><td>Black</td><td>Supply -</td></tr> <tr><td>White</td><td>Earth</td></tr> <tr><td>Shield</td><td>Earth</td></tr> </table>	Brown	Supply +	Black	Supply -	White	Earth	Shield	Earth
Brown	Supply +									
Black	Supply -									
White	Earth									
Shield	Earth									

### CALIBRATION / SETTING

Factory configuration

Measuring range calibrated:

Nominal measuring range or as per the order data

Current output:

4...20 mA with extended span between 3.9 and 21mA

Damping:

0s

Mains frequency:

50Hz

Measuring value / measuring unit

Pressure / mbar

Current output in the event of a fault:

hold (last value is held)

### ORDER INFORMATION for PIEZOMESS (PZM) and VARIMESS (VRM)

#### Electronics

100	4...20mA, integrated LCD display, TD 10
101	4...20mA, can be operated with OPUSM, TD 10

#### Sensor's measuring range / pressure type

##### PZM

C	0.35bar max. overload 1bar
E	1bar max. overload 3bar
G	2.5bar max. overload 8bar
J	5bar max. overload 15bar
K	10bar max. overload 30bar
M	30bar max. overload 90bar
Q	100bar max. overload 250bar
R	Relative pressure, overpressure (0...xxxbar)
N	Relative pressure, vacuum (-1...xxxbar)
A	Absolute pressure

##### VRM

H	4bar max. overload 25bar
K	10bar max. overload 40bar
L	20bar max. overload 40bar
N	40bar max. overload 60bar
P	70bar max. overload 105bar
R	Relative pressure, overpressure (0...xxxbar)
N	Relative pressure, vacuum (-1...xxxbar)
A	Absolute pressure

#### Electrical connection

K	Cable screw connection M16x1.5
M	Round plug-in connector M12x1
R05	Reference cable, 5m, securely fixed
R10	Reference cable, 10m, securely fixed
R15	Reference cable, 15m, securely fixed
R20	Reference cable, 20m, securely fixed
R25	Reference cable, 25m, securely fixed
RXX	Reference cable, length in excess of 25m is to be stated in plain text (max. 80m)

#### Run options (only with PZM)

T1	Normal temperature option
T2	High temperature option for medium temperatures of up to 200°C
